Working the Trend

- The new Spring Couture collections showed that luxurious fabrics and trims are a key directions that will carry into mainstream fashion
- Brocade - with an emphasis on metallic threads - added instant elegance to outerwear and suits.
- Textured surfaces add dimension and elevate even basic garments. Crystals and stones add a luxurious look - to garments and accessories.
- Fabrics have luster and sheen - taffetas, silks, lamé, jacquards with metallic thread.
- The jewel encrusted jacket is the new statement piece - paired with just about anything from jeans to evening wear.
- Foil printing on drapey fabrics can bring the metallic look through - at all price points.
